

**\*\*State VOC Restrictions for PLZ Branded Products\*\***

Dear Valued Customer,

As you may already know, many states have restrictions on the volatile organic compounds or 'VOCs' that may be contained in products. Most of our products are VOC compliant in all 50 states, however some PLZ products are prohibited for sale in certain states and Customers must only resell those products in states where they are compliant. PLZ continues to offer these products for sale in states without VOC restrictions to meet Customer expectations when reduced-VOC products do not exhibit the same performance characteristics.

In an effort to help our Customers stay in compliance in the states where they do business, PLZ has launched a resource that shows state-by-state compliance for all PLZ products.

**The link to the PLZ VOC Guidelines is:**

<https://www.plzaeroscience.com/voc-guidelines/>

Find the product in the matrix to determine in which states the product can be sold and where it is not compliant.

For more information on VOC regulations, please refer to PLZ's VOC Technical Brief located at the link above.

For your convenience, we have attached a copy of the compliance guide to this communication.

PLZ hopes that this information helps our Customers navigate the complex State regulations that apply to our products. If you have any questions, please contact your salesperson.

**Thank you for your continued business!**
